

MOSN-256

TO: Distribution
FROM: M. L. Goudy
DATE: 21 July 1972

SUBJECT: Device Identifications Used on Configuration Cards.

The following device identifications have been used in the peripheral device descriptions on the PPPH cards in the BOS CONFIG deck. These device identifications have not been registered.

The purpose of this MOSN is to provide a complete list so that programmers and operators specifying PPPH cards (or similar cards) in the future will not duplicate a device description already used and will not give a extra name to a device already described.

<u>Device Description</u>	<u>Device</u>
prta	PRINTER
prtb	PRINTER
puna	Card punch
tap7	7- TRACK TAPE DRIVE
tap9	9- TRACK TAPE DRIVE
