Identification

td\_writebcd  
T. P. Skinner

(Note that the following is an Abstract, which should be replaced by a full description at a later time.)

## Function of Entry:

To write a 14 word bcd record given an ASCII string of the proper length. It converts the string to bcd and pads with blanks. It calls the tape dcm.

## Calling Sequence for Entry:

```
call td_writebcd (ioname, p, n, error);
```

## Declaration of Arguments:

```
dc1 ioname char(32),  
    p ptr,  
    (n,  
    error) fixed bin(17);
```

## Description of Arguments:

ioname - name of tape drive.  
p - pointer to data to be written.  
n - number of characters of data.  
error - 0 (no error)  
 2 (tape error)
