IdentificationTD_FILE
D. L. Stone

(Note that the following is an Abstract, which should be replaced by a full description at a later time.)

Function of Entry:

To process a tape daemon control file and cause all appropriate action to be taken.

Calling Sequence for Entry:

```
call td_file(bptr, bcount, dir);
```

Declaration of Arguments:

```
dc1 bptr ptr,          /* ptr to binary segment associated
                        with control file (or null) */
bcount fixed bin(17), /* length in words of binary
                        segment */
dir char(*) varying; /* default directory in which to
                        find files specified only by
                        entry name */
```

Description of Arguments:
