Identification

print_dbrs
J. Gintell

(Note that the following is an Abstract, which should be replaced by a full description at a later time.)

Function of Entry:

To print the values of the ring 0, 1 and 32 DBR settings so that communication with BOS is made easier.

print_dbrs will print these values and return.

print_dbrs\$call_listener will print these values
 and then call the listener (to allow dbr
 values to be printed when a process is
 created).

The values are obtained via a call to get_dbrs (BY.99.04).

Calling Sequence for Entry:

call print_dbrs

call print_dbrs\$call_listemer

Declaration of Arguments:

No arguments

Description of Arguments:
